## Here's the Corn Binder You Want

The John Deere is the kind of binder you want in your corn fields. There's little work for you in operating it, and it's easy on the horses. It's the biggest improvement made in corn binder construction for many years.

## JOHN DEERE CORN BINDER

The Binder With Power Carrier and Quick Turn Tongue Truck

The John Deere is equipped with a power bundle carrier. To dump the bundle only slight pressure on the carrier trip is necessary. The bundles are delivered all in one pile away from the path of the horses—this is a labor-saving, worth-while feature.

You will like the Quick Turn Tongue Truck. It takes off all neck-weight from the horses and enables them to turn at the ends freely and easily. This truck makes the horses' work a lot easier.

The John Deere does good work in any field in which a corn binder can be operated. It has a wide range of adjustment

which makes it possible to operate it in extremely tall corn.

It is equipped with roller and ball bearings, 17 sets in all, which lighten the draft and decrease the wear.

It has three packer arms and four discharge arms on the regular attachment instead of two commonly used on other binders. This insures prompt discharge and complete separation of the bundles.

In every particular you will find the John Deere Binder is built on a quality standard that means real satisfaction and profit to you.

Come in and let us show you other important features on this better binder.
